

For Sale: A used LMS Hydropower volumetric baler (Ref: #E17032).

This baler consists of a standard specification LMS Hydropower (circa 1988) volumetric style baler with integrated horizontal load and eject hydraulic functions powered from the integrated hydraulic power unit and interconnecting hydraulic hoses. All functions of the baler are operated via the local push button control panel mounted to the side of the main fabrication.

The baler is supplied with a fabricated bolt on bale chute (plus 2 spares) and designed for ejecting compacted product into a pre-formed plastic bag. Nominal internal chute dimensions are 500mm (h) x 270mm (w) x 750mm (l)

The baler was original designed and integrated into a system for producing Woodshavings bales and has been retained in storage as a back-up machine. The baler is available for viewing on request at our customers site within the UK.

Price - £ 6,450 ex VAT, ex works, sold as seen.
